

14 June 2024

Dear parents and carers

Thank you for your recent contributions to the **One-to-One Devices Survey**. The information received from parents enabled us to start negotiations with the companies providing the devices. Unfortunately, due to the short time until the end of Year 11, we were unable to agree an economical price for the devices, and the monthly cost would have been over £25. For this reason, **we have decided not to introduce the One-to-One device programme for Year 9.**

If, however, you would still like to go ahead and purchase one of these devices for your young person, we can still facilitate this; the cost will not be above £26 over two years, with all the same benefits. If you would like to take advantage of this offer, [please complete THIS FORM.](#)

Best wishes
Mr B Stafford
Senior Leader – Director of Emerging Technologies
