Dear Year 9 parents and carers

Science in the Summer Term for Year 9

The summer term in Year 9 Science is exciting as students have formally started learning the **Key Concepts for their GCSE Science course**, focusing on the fundamentals of Biology, Chemistry and Physics. This content is in both the Combined Science and Triple Science courses which we will study through Years 10 & 11.

Homework will continue to be issued electronically and will often comprise of practice exam questions for revision which are marked in lessons. To be successful students should also, as part of their weekly homework, be making revision cards, posters, notes, watching podcast on GCSEPOD and using BBC Bitesize. Practice questions are also available on <https://www.savemyexams.co.uk>; the exam board we use is Edexcel. You can choose to pay a membership to get the answers to these, or students can bring them in for their teacher who will mark them.

If you have question or concerns on the progress of your young person in Science please do not hesitate to contact either their current science teacher, or myself or the Director of Science (Mrs Gray kgray@carringtonschool.org)

Best wishes
Ms L Avery
Key Stage 4 Science Coordinator
